02

FEBRUARY

Plant Native Species

If you have a garden, plant flowers and shrubs native to your area to support local pollinators like bees and butterflies.

03

MARCH

Stop the "Leak"

Electronics draw power even when "off." Unplugging them cuts off the invisible leak of electricity and money from your home.

04

APRIL

Zero Emissions

Walk, bike, or use public transport for shorter trips to save energy and reduce the air and noise pollution.

05

MAY

Efficiency Lighting

Use LED lightbulbs to reduce energy consumption.

06

JUNE

Plastic-Free Portables

By keeping a bottle and bag on you, you create a "portable shield" against single-use plastic. You stop the waste before it even reaches your hands.

07

JULY

Compost food scraps

Compost organic waste to enrich soil and reduce landfill use.

08

AUGUST

Value Every Drop

Stop the 34% waste of clean water and the massive amount of energy used to pump and filter it.

09

SEPTEMBER

Purposeful Power

It is the simplest, zero-cost way to reduce global energy that drains the planet's resources for an empty room.

10

OCTOBER

Sustainable Diet

Eat more plant-based meals to lower your carbon footprint.

11

NOVEMBER

Nature's Battery

It represents the ultimate sustainable "power bank" for the world.

12

DECEMBER

Cold Water Rinse

Use the cold setting for your laundry; clothes get just as clean and you save energy.
